### PostgreSQL

### JavaScript

### Hotwire

### React

### Tailwind CSS

### Bootstrap

### Linux

### Microsoft Windows

### macOS

### Docker

### Amazon Web Services

### Git Version Control

### Python

## EXPERIENCE

### Senior Software Engineer

**The Juice (now AudiencePlus)**

Full-time · Jan 2021 – Present · Indianapolis, IN

- ✓ Created and improves curated content marketing discovery web platform.
- ✓ Built and maintains manual and automated processes to find, store, organize, QA, and publish content marketing found on the Internet through human workflows and leveraging AI services.
- ✓ Created custom in-house curated content feed populated via followed brands, interested topics, and recommendations based on similar member interests.
- ✓ Built custom HubSpot and Salesforce integrations pushing actionable intent data and linking interactions with leads and deals.
- ✓ Set up integration with Stripe for non-enterprise customers to onboard with just a credit card and bypass the larger sales process.

Ruby on Rails · PostgreSQL · Heroku · Hotwire · JavaScript · Redis · Stripe · Tailwind CSS · Amazon S3

### Web Engineer + Server Admin

**GoNintendo.com**

Freelance · Oct 2006 – Present

- ✓ Develops, manages, and maintains custom built video game journalism website.
- ✓ Performs scheduled maintenance and improvements for server infrastructure.
- ✓ Founded and manages community Discord server serving both site visitors and contributors.
- ✓ Migrated disjointed WordPress and phpBB site into a unified, custom built PHP site. (July 2011)
- ✓ Rebuilt site and migrated from PHP / MySQL to Ruby on Rails / PostgreSQL. (May 2015)

Ruby on Rails · PostgreSQL · Hotwire · JavaScript · Caddy · Ubuntu · Linode · Tailwind CSS

### Senior Software Engineer

**Blueprint**

Full-time · Nov 2019 – Jan 2021 · Zionsville, IN

- ✓ Created a multi-vendor product ordering system allowing agnostic order placement through a front-end form, API, or bulk files regardless of a vendor's systems.
- ✓ Created internal framework to provide vendors ordering capabilities without an API integration.
- ✓ Created a new system to facilitate the complex mechanics of large commodity transactions.

Ruby on Rails · PostgreSQL · Heroku · React · Twilio · Amazon S3

### Senior Software Engineer

**Springbuk**

Full-time · Jul 2017 – Nov 2019 · Indianapolis, IN

- ✓ Implemented on-the-fly anonymized PHI system to allow users to safely view detailed data without exposing sensitive information.
- ✓ Designed custom background processing system for orchestrating data import and normalization.
- ✓ Created custom synchronization system to move data from a warehouse to user-facing application database.
- ✓ Lead major Ruby on Rails upgrade initiative.
- ✓ Assisted DevOps in containerization of entire platform for AWS.

Ruby on Rails · PostgreSQL · Bootstrap · React · Amazon S3 · AWS Lambda · Amazon ECS · Python
